

Why We're Different

From sub-clinical toxicology to environmental psychology and business, our masters- and doctorate-level expertise comes together to elevate building performance.

SCIENCE is our core, not an extension of core business. Your project gets the benefit of our singular love of measurement, labs, puzzles, and data.

INDEPENDENCE: You always get a rigorous assessment because as specialists, we'll never have a conflict of interest.

CONFIDENCE: Hundreds of clients around the world trust us because due to our unrivaled global experience, we are the sure partner for shoring up desired outcomes.

How CETEC Minimizes Risk

CETEC is an international building science consultancy that specializes in optimizing the impact of the built environment on the occupants. The breadth of our applied knowledge reflects the complexity of humans' interaction with the built form.

Productivity

People costs account for up to 90% of an organization's outgoings. We provide you with a rigorous basis for unlocking, demonstrating, and sustaining a stronger ROI on your project.

- Pre- and post-occupancy evaluations 
- Productivity studies 
- Stakeholder engagement 
- Policy and procedure development 

Environment

- Soil and water testing 
- Contamination audits 
- Plume studies 
- Air tightness testing 
- Compliance assurance 
- Decontamination 

Informed Decision-Making

Invited by governments, industry groups, Green Building Councils, ISO, IWBI, we shape the standards that our industry follows and have an acute sense of their intent and the disruption likely to be just around the corner.

Wellbeing

Since most of us spend over 90% of our lives indoors, we help you leverage the immense impact of the built environment for the benefit of the occupants' wellbeing and long-term health.

 Indoor environment measurement

 Performance verification: WELL, LEED, Fitwel, Green Star, NABERS

 Testing and mitigation: chemical, radiation microbiological

 Ongoing monitoring

 On-call triage and investigations

 Materials failure investigations

 Emissions testing

 Dangerous goods risk

 OH&S and occupational hygiene

CETEC by the Numbers

Our reputation is built on rapid and rigorous diagnosis and intervention where human lives and/or asset value may be at stake. Here's a look at the scale that uniquely positions us to offer both reactive and proactive technical risk management.

25 countries

32+ years in practice

150+ WELL Performance Verifications

260+ combined years of tertiary studies

40,000+ projects

1,000,000+ laboratory tests

15,000,000+ impacted occupants
